ABSTRACT

Producing is the process of removing the result in the writing process. Writing is a means to communicate indirectly. All students would have the potential to write, including writing a text review drama based on the structure, characteristics of language, and writing conventions. Photo collection is a medium that requires students to learn to be more active, creative, and innovative. To that end, the authors conducted a study to produce drama review text by using photo collection media in class XI SMA Al-Falah Bandung.

The problems that the authors propose in this study are: (1) Can the author plan, implement and evaluate learning producing drama review text by using photo collection media in class XI SMA Al-Falah Bandung?; (2) Can the students of class XI SMA Al-Falah Bandung producing drama review text according to the characteristics of the structure, characteristics of language and writing conventions?; (3) Effective media collections of personal photos used in producing learning drama review text by using photo collection media in class XI SMA Al-Falah Bandung?.

This study aims to determine the ability of the author, the ability of students, the effectiveness of the media in learning to produce a collection of photos of text reviews drama in class XI SMA Al-Falah Bandung.

The hypothesis that the writer formulated, namely: (1) the author is able to plan, implement and evaluate learning produces text reviews drama by using media collections of photos in class XI MIA SMA Al-Falah Bandung; (2) students of class XI MIA SMA Al-Falah capable of producing text review the structure of the drama, linguistic characteristics and rules of writing texts with appropriate drama reviews; (3) The collection of photographs is effectively used in learning mem-production drama review text in class XI SMA Al-Falah MIA Bandung.

The research method that I use is a quasi-experimental method of type one group pretest-postet design. The results of the research, the first hypothesis is accepted with the results of assessment planning and implementation of learning author 3.90. The second hypothesis is accepted, dati seen the average value of 26.1 and after following the posttest reached 66.1, an increase of 40.5. The third hypothesis is accepted, with proof of the results of statistical tests tcount> ttable ie 8.9> 3.13 in the 95% confidence level with a significant level of 5% and 29 degrees of freedom.

Thus, the authors conclude that the media have the right collection of photographs used in producing instructional text reviews Bandung. Because it can train students to improve learning towards better learning, especially at the time of the review text produced drama.

Keywords: Learning, producing, text reviews the drama, and photo collections.
