## **ABSTRACT**

This research is about discovery learning model application to cultivate the national spirit and improve learning outcomes of students of SDN Cijeruk fifth grade subdistrict Ciwidey in social studies learning Competency Appreciating People Services and Role In Preparing for Indonesian Independence. The method used is the Classroom Action Research (PTK) with a cyclical system that consists of the stages of planning, implementing action, observation and reflection. The experiment was conducted in two cycles consisting of 2 meetings in each cycle. in every cycle implemented learning activities by using the steps in discovery learning model. Data collection techniques used were observation, test and documentation. Based on the implementation of the actions taken as a whole has shown an increase from the beginning of the data learning process. Data obtained from the results of observations on the implementation plan of learning the first cycle is the percentage of 61.42% and the second cycle increased to 81.42%. As for the implementation of learning from observations of the cycle I get the results 67.14% in the second cycle increased to 79.04%. The value of the national spirit observations of students in the first cycle is equal to 45.83% in the second cycle increased to 77.50%. The percentage of student learning outcomes in the first cycle is 33% or 10 students that reached minimum criteria, then in the second cycle the percentage of student learning outcomes is 73.33% or as many as 22 students that reached minimum criteria. From these data it can be concluded that the application of discovery learning model to foster national spirit and improve student learning outcomes of Cijeruk Elementary School fifth grade in social studies learning to appreciate Services Competency and Role in Preparing independence here.
