

ABSTRACT

The title of this research is the influence of professional competence of teachers and learning facilities to the learning outcomes of students in economic subjects in 19 Bumi Siliwangi Bandung Senior High School. The purpose of this study was to determine how much influence the professional competence of teachers on learning outcomes, how much influence the learning facility to the learning outcomes and how much influence simultaneously professional competence of teachers and learning facility on learning outcomes. The method used in this research is survey by using causal associative approach. Data collection techniques used were questionnaire, documentation and literature with data processing techniques validity, reliability, data normality test, correlation, multiple linear regression analysis, the coefficient of determination simultaneous and partial determination coefficient using SPSS 21.0 for Windows program. In this study used a sample of saturated samples (census study), the student class x society, xi society and xii society 19 bumi Siliwangi Bandung Senior High School, second semester of academic year 2015/2016, amounting to 85 students. Seen from the data processing there is a correlation between the variables X_1 and X_2 to variable y of 0.646 that means the very strong correlation, multiple linear regression of $y = 4.820 + 0.490 + 0,552x_1 + e$, the coefficient of determination or R^2 89.4%. Significant influence on the professional competence of teachers on student learning outcomes by 47.94%, there is the influence of learning facilities to students learning achievement of 41.48% and a significant influence on the professional competence of teachers and learning facilities to students learning outcomes by 89, 4%. and the remaining 10.6% is a variable that is not examined in this study that affect student learning outcomes. Conclusions of this study are shown to exist between the influence of the professional competence of teachers and learning facilities to the learning outcomes of students in economic subjects in 19 Bumi Siliwangi Bandung Sennior High School. As end of the study authors gave suggestions to teachers in order to improve their professional competence and take advantage of learning facilities to support learning activities teaching, and for schools to provide opportunities for teachers in order to improve their professional competence.
