Research of Cooperative Learning Methods, types of Student Teams Achievement Division (STAD) in an effort to enhance student learning outcomes on economic subjects of class X in high school Pasundan 8 Bandung, with the aim to find out whether there is a difference in student learning results before being given treatment was given at the time the posttest and to find out whether the type of Student Teams Achievement Division (STAD) can improve student learning outcomes in high school Pasundan 8 Bandung. Many factors affect student learning outcomes, one of which is a learning method applied to teachers in the classroom.

The methods used in this research is experimental design and methods used are a Quasi Eksperimen Design, from design Quasi Eksperimen that is selected is the Control Group Time Design, which becomes the object in this study are student class X-1 with total of 31 people as class experiment and student class X-2 with a total of 29 people as a class controls.

Student learning outcomes data retrieved from the posttest result multiple choice. The results multiple choice. The result of this research study result showing the difference of 84,25 for the class of experiment, and 55,79 for the class of control. This is evidenced by the different test result value $(t)$, from the above calculations is obtained while $t_{count} = 17,46$ and $t_{table} = 2,75$. So that when inserted in the formula $t_{count} > t_{table}$ hypothesis, $H_0$ unaccepted and so $H_1$ accepted.

The conclusion is there is an increase in student learning outcomes between the X-1 that uses the model of learning Student Teams Achievement Division (STAD) and students of class X-2 which do not use method of learning Student Teams Achievement Division (STAD). From the results of the study recomended learning with a Learning Method Cooperative Learning type of Student Teams Achievement Division (STAD) can improve student learning outcomes, preferably in as one of the alternatives in the activities of economic studies especially on material of national income.
