This study aims to increase the participation and achievement of learners in the learning of social studies on cooperatives in the fourth grade Lengkong State. This research is based on the low participation of learners that have an impact on the achievement of students who tend to be low. This is due to lack of teachers' skills in choosing models, methods and learning media are less varied. Classroom Action Research (PTK) is adapting the model of PTK Kemmis & Taggart were conducted in two cycles and each cycle consisting of several stages of the planning, implementation, observation and reflection. This study uses learning methods everyone is a teacher here. Evaluation techniques were used in this study are engineering test and non test. Mechanical tests are used to determine the results or student achievement, while the non-test techniques are used to determine students' participation and performance of the researcher as a teacher. The results showed that the method of learning everyone is a teacher here can increase the participation and achievement of learners. Value participation of learners has increased in each cycle. Value participation of students in the first cycle obtained an average score of 19.87 in the medium category. While on the second cycle obtain an average score of 24.7 in the high category. In the assessment of achievement of students also increased in each cycle. In the first cycle to 73.07% gain mastery learning. While on the second cycle 96.29% gain mastery learning. Based on the results of this study concluded that the learning method everyone is a teacher here can increase the participation and achievement of students in the learning material IPS cooperative in class IV SDN Lengkong Bojongsoang District of Bandung Regency, and can be used as an alternative learning methods to be applied to the learning of SBC.
