ABSTRACT

Writing is one of the indirect communication activities. Writing is a productive activity. One way to increase creativity in the teaching of writing, namely the presence of media that can encourage learners. Projected Motion Media is considered sufficient effectively to enhance creativity in the learning process of writing.

Based on the results above pemeparan writer interested in conducting research with the title: "Learning Creative Writing Poetry Text Using Media Projected Motion in Class VII B SMP Pasundan 2 Bandung". The title of the authors formulate several issues, including: 1) Can the author plan, implement, and assess learning creative writing poetry texts by clicking on the Motion Projected use the media class VII student of Pasundan 2 Bandung? 2) Can the class VII student of Pasundan Bandung write poetry text mem-noticed elements of poetry? 3) Effective media Projected Motion applied in teaching writing poetry texts in class VII student of Pasundan 2 Bandung? This study aims to determine the ability of the author, the ability of learners, and the effectiveness of media Projected Motion in learning to write poetry texts in class VII B SMP Pasundan Bandung.

The hypothesis that the writer formulated as follows: 1) The author is able to plan, implement, and assess learning producing poetry text using the projected media motion in Kela VII B SMP Pasundan Bandung. 2) The students of class VII B SMP Pasundan 2 Bandung able to write poetry text in accordance with the elements of poetry. 3) Media projected motion effectively used in learning to write poetry texts in class VII B Pasundan 2 Bandung.

The research method that I use is experimental method with engineering literature study, observation, testing, testing, and analysis techniques. The results of his research as follows:

1. The author is able to plan, implement, and assess learning creative writing poetry text using the projected media motion in class VII B SMP Pasundan 2 Bandung. This is evidenced by the value of planning and implementation 3.60.
2. Class VII B SMP Pasundan 2 is able to write poetry text based on elements of poetry texts. This is evidenced by the average value of pretest? and post-test? With the rise?
3. Media projected motion appropriately used in learning to write poetry texts in class VII B SMP Pasundan 2 Bandung this is evident from the results of statistical calculation tcount?> T table at a rate of 95% and by 21 db

Based on these facts, the authors conclude that the author did successful learning.

Keywords: Learning, creative writing poetry text, text elements, media projected motion
