ABSTRACT

Text explanation complex is text to explain and clarify something that departs from the facts and then generate a general conclusion. Model Example Non-Example is a learning strategy that uses images as a medium to deliver learning materials. Relative to the author interested in conducting research on learning produces text eksplanation complex by using the model example non-example in class XI student of SMAN 17 Bandung.

The problems that the authors propose in this study are: (1) Can the writer implementing learning producing text explanation complex by using the model example non-example in class XI student of SMAN 17 Bandung.?; (2) Can the class XI student of SMAN 17 Bandung producing text explanation complex by using the model example non-example to the right?; and (3) Effective the example non-example models applied in producing learning text explanation complex in class XI student of SMAN 17 Bandung?

The hypothesis that the writer formulated, namely: (1) The author is able to carry out learning produces text explanation complex by using the model example non-example; (2) Class XI student of SMAN 17 Bandung is able to follow the learning producing text explanatory complex by using the model example non-example; and (3) A model example non-example appropriately used in producing learning text explanation compelex in class XI student of SMAN 17 Bandung.

The research method that I use is a quasi-experimental/ quasi-experimental techniques literature research, tests and analysis. The results of his research as follows.

1. *The author is able to carry out learning produces text explanation complex by using the model example non-example in class XI student of SMAN 17 Bandung. This is evident from the results of assessment planning and implementation of learning reached 3.68. Planning and implementation of learning that has been implemented can be expressed Good (B), so the authors considered to successfully execute learning produces text explanation complex by using the model example non-example.*
2. *Students in class XI SMA Negeri 17 Bandung is able to follow the learning producing text explanation complex by using the model example non-example. It is evident from the average value of 2.35 pretest and posttest average value of 3.11. The increase of 0.76.*
3. *Model example non-example appropriately used in producing learning text explanation complex. This is evident from the results of statistical calculations with the results thitung 12.5, ttable of 2,056 at 95% confidence level, and the degrees of freedom of 26. That is, the authors conclude that all hypotheses were formulated acceptable.*

Keywords: Model Example Non-Example, Produce, Text Explanatory Complex.
