

ABSTRACT

Widya Syntiana. 2016. Based On increasing Study Result To Student At Konsep Protista Using Media Flashcard. Under Guide of Dr.rer.nat H. Ama Rustama and Dr. Hj. Mia Nurkanti M.Kes.

This research as a purpose to prove the increasing of student study result using media *flashcard*, using kuantitatif approachment with *Pre-Experimental Design* methode in the form of *One Group Pretest-Posttest Design*. The population which use is class X SMA PGRI I Bandung based on *Purposive Sampling* has set class X MIA 1 as eksperimen group and class X MIA 2 as a control group. Skor posttest to eksperimen group in the amount of 27,88 and at the time posttest in the amount of 77,93. Skor pretest to control group in the amount of 23,1 and at the time of posttest in the amount of 55,8. The result of test analysis t_{posttest} obtained result with $t_{\text{hitung}} = 9,01$ and $t_{\text{tabel}} 2,76$ with significant degree $\alpha = 0,01$ is obtaine $t_{\text{hitung}} > t_{0,01} \rightarrow 9,01 > 2,76$ with the result that H_0 rejected H_a accepted, it can be conduced that using *flashcard* methode can increase the result study of student compare to control class. The result of affective assessment to class eksperimen is 88,8% to the class control is 55,5%. The result of psikomotorik assessment to class eksperimen is 93,7% to the class control is 62,5%. It can be concluded that there is an increasing to study result to domain kognitif, affective and psikomotoric which using media *flashcard* at SMA comparace to result study to control group.

Key Word : Media *Flashcard*, Study, Result
