

## ABSTRACT

The title of this research is “The influence of learning facilities toward learning outcomes of students” (In Economy Subject Class X Social second semester SMA Nugraha Bandung). This research was conducted to determine how many the influence of learning facilities toward learning outcomes, how many learning outcomes and how the influences of learning facilities toward learning outcomes in Economy subject SMA Nugraha Bandung. Quantitative with associative casual design was used in this research. To collect the data this research used questionnaire, documentation, and literature. To process the data this research used validity test, reliability test, normality test, correlation test, simple linear regression analysis and coefficient of determination test using SPSS 21.0 for windows. This research used census sample, the students of class X social SMA Nugraha Bandung, which are Class X social 1 and X social 2 in second semester of academic year 2015/2016 consists 80 students as a sample of this research. The research result shows that there is positive influence of learning facility toward learning outcomes of the students in economic subject second semester class X social SMA Nugraha Bandung. It is seen from the results of data processing using SPSS 21.0 for windows. The results show there is a correlation between the variables X and Y of 0,744 that means the correlation is strong enough, a simple linear regression of  $Y = 5,403 + 0,549 X$ , and the coefficient of determination or  $R^2$  of 55,4%. Variable X show the average is equal to 81 %, which shows students agreed that the facility learning can improve learning outcomes of students. Variable Y shows the average is equal to 80,2%, which shows that students of class social SMA Nugraha Bandung influenced by internal and external factors. As the end of the research, researcher would like to give suggestions to the economic teachers to use learning facilities in order to simplify, accelerate and streamline learning process to achieve learning goals and provide opportunities for students to active in the learning process and make a good result for learning outcomes of students.

**Keywords:** Learning facilities, learning outcomes
