

## ABSTRACT

A teacher is human figures source position and plays an important role in the achievement of educational goals. While the motivation is the result of processing so that learners enterprising teachers and focus on learning. The formulation of the problem in this research how professional competence of teachers in the teaching of economics in class XI IPS SMAN 4 Cimahi 5? How much influence the professional competence of teachers on students' motivation?

Teacher competence is a set of capabilities that must be owned by a teacher in carrying out its duties include educating, training, assessing and evaluating students. Motivation as an impetus that will cause a person to perform an act in order to achieve certain goals. The method used is associative causal research methods. Sugiyono (2012, p. 57) states that the causal associative. Causal associative method is the formulation of research problems that are to question the relationship between two or more variables. The causal relationship is a relationship that is both cause and effect, so in this study are the independent variables (affecting) and dependent (influenced). Professional competence of teachers as an independent variable (cause) and the student's motivation as the dependent variable (effect).

Based on the background of the problem, formulation and problem definition, the authors give a hypothesis in this study that the "Great Teacher Professional Competence Effect on Student Motivation in the subjects Economy class XI IPS in SMA Negeri 4 Cimahi 5".

Based on the overall results of the study obtained data is processed using IBM SPSS Statistics 21.0 for Windows. The influence of professional competence of teachers on motivation to learn is provided in Table 4:28 namely determination coefficient of 62.5%. It is claimed that between variable X with variable Y has an effect of 62.5% and the remaining 37.5% is influenced by other factors not examined by the author.

Suggestions for in educational research, the author would like to give some advice to the parties involved in the manufacture of paper and research, it aims to give an overview to the parties who require, that make schools more intense in order to give students the motivation to learn
