ABSTRACT

This research aims to improve cooperation and student learning outcomes by using a model of problem-based learning in social science learning the subject of ethnic diversity. This research was carried out in class IV SDN Jati Satu and backed by the state of the student who shows less their cooperation in the process of group work and the results of the study under the KKM because teachers often use the lecture method which tend to be monotonous and not using a problem based learning model. This research uses a Class Action Research (PTK) by using the cycle system consist of a planning, implementation, observation, analysis and reflection. This research carried out in 2 cycle with 2 meetings on every cycle and apply the learning problem based learning model which consists of 6 phases, namely the stimulus/stimuli administration, the statement/problem identification, data collection, data processing, verification, draw conclusions/generalizations. The assessment used in this research is a technique test to determine student learning outcomes, assessment and collaboration observation sheet to determine the activities of teachers and students during the learning process. The result showed an increase in average point of the assessment of cooperation and the result of the study. In the assessment of the activities of the average value of the cycle of 1, which is 66,45 while the two reached the average value of 75,5. The result of learning cycle 1 the average value of which is 64, and the cycle of two average score at 78,50. This shows that the use of the problem based learning model can enhance cooperation and students learning outcomes in a Social Sciences subjects learning ethnic diversity on class IV SDN Jati Satu. Thus, the use of problem-based learning model can be used as one of the learning models to be applied to Social Science learning with other subjects.

Keywords: problem-based learning, cooperation, learning outcomes.
