ABSTRACT

This study aims to improve the fairness, and the results of student learning using cooperative learning model of type Numbered Head together on cooperative learning social studies materials. The research was conducted in the fourth grade SDN Batukarut II and the background situation of students who show little honest attitude in the learning process and learning outcomes are still many under the KKM because teachers often use the lecture method is monotonous and not using a model of cooperative learning type Numbered Head Together.

This study uses a Class Action Research (PTK) using the system cycle of planning, implementation, observation, analysis and reflection. This study was conducted in two cycles with two meetings in each cycle and apply the learning discovery learning model consists of four phases, namely numbering, ask questions, to think together, answered. Ratings were used in this study is the engineering test to determine student learning outcomes, assessment of students 'honesty, fairness, students' questionnaire responses and observation sheets to determine the activities of teachers and students during the learning process.

The results showed an increase in the average value of an honest attitude assessment and learning test results. In an honest attitude measures the average value of cycle 1 is 66.84 while the second cycle reaches the average value of 79.23. Learning outcomes 1st cycle average value is 69.39, and the learning outcomes second cycle the average value reached 80.06. This shows that the use of the type cooperative learning model of Numbered Head Together can improve fairness, and student learning outcomes in social studies learning materials cooperative in class IV SDN Batukarut II. Thus, the use of cooperative learning model of Numbered Head Together type can be one of learning model to be applied to social studies learning with other materials.

Keywords: cooperative learning type Numbered Head Together, honesty, learning outcomes.
