ABSTRACT

In building the character of the national spirit of students in the learning process is not easy, because a teacher must be able to apply the method in accordance with the learning materials. In the process of learning by creating a learning atmosphere that attracted the attention of learners, learner-centered, useful, democratic, and fun. This can be realized through the method of initiation of a debate on a material threat to the nation Indonesia in building the character of the national spirit learners. With the character education through PPKn expected to restore the national spirit in the form of nationalism in self-learners. Thus the researchers melakukan penelitian with titles implementation method of initiation debates in building the national spirit of students in the material threat to the nation of Indonesia. This study aims to provide factual evidence and describe the learning process by using debate in class X so that the national spirit learners increasingly reflected in the form of the behavior of learners in the school environment. This research method is a descriptive study. This research was conducted in SMA Kemala Bhayangkari involving 37 students consisting of 19 class X and 18 X MIA IIS. Meanwhile, to get information and research data taken from each class as many as five people. The results of this research were observation and interviews. The analysis of the observation of the implementation of the method of initiation debate in class X MIA 82.29% and in class X IIS reached 78.12%, this shows that this method is best used in the learning of Civics. This method can build the national spirit learners. this can be seen from the observation that received 76, 66%. Conclusions from this research that the implementation of the method of initiation of the debate can build the character of the national spirit learners.
