

ABSTRACT

Implementation is the act of applying (a large dictionary Indonesian).

Learning Model is a reference to an approach to learning, including its objectives, the syntax, the environment, and systems management. Learning Model Group Investigation is a small group to guide and encourage the involvement of students in learning. This method requires students to have a good ability to communicate well in a group process skills. The final outcome of the group is the contribution of each group as well as the idea of group learning that in fact further hone the students' intellectual abilities compared belajar individually. cooperative learning strategies are putting students into groups to conduct an investigation on a topic. In connection with this, the authors are interested in conducting research on learning with group investigation on the model of class IX students of SMPN 2 North Cikarang 2016-2017 school year.

This study aims to determine the knowledge and abilities of students in the material participation in advocacy efforts at the state class IX students of SMPN 2 North Cikarang. The hypothesis that the writer formulated in this study, namely: (1) This study aims to determine the knowledge and abilities of students in the material participation in advocacy efforts at the state class IX students of SMPN 2 North Cikarang. The hypothesis that the writer formulated in this study, namely: If the learning plan using model group investigation planned properly it will run smoothly and successfully. (2) If the implementation of the model study group investigation carried out properly then the learning process will take place properly. (3) If the learning process using a model of group investigation it will improve student learning outcomes on the subjects of civic education.

The research model that I use is observation, testing, and interviews. The results of the analysis as follows:

1. classroom action research with the goal of improving learning outcomes of students in the material participation in the effort to State defense held for two cycles, because the second cycle learning outcomes of students are reaching the target achievement of KKM KKM ie above 73%.
2. The method used in an effort mneingkatkan learning outcomes of students is grup investigation method is a form of cooperative learning that emphasizes the participation and activities of the students to find their own material (information) lessons will be learned through the materials available, for example from the book lessons or students can search through the internet. Students are involved from the planning, both in determining the topic as well as a way to learn through investigation. This type requires students to have a good ability to communicate well in a group process skills. Model Group Investigation can train students to cultivate the ability to think independently. Active student involvement can be seen from the first stage to the final stage of learning.
3. The class action research both in cycle I and II increased with stable and constant. In the first cycle increased by as much as 46% of learners who are able to achieve

KKM value corresponding to the average value reached 71.6 class. Then in the second cycle obtain the results as much as 73% of students who received grades according KKM, all students are able to achieve an appropriate value KKM with the average value of the class can achieve 80,00. Sehingga group investigation concluded that the method can effectively improve the learning outcomes of students the material Participation in state defense efforts.
