

ABSTRAK

Perekrutan karyawan *outsourcing* dilakukan oleh perusahaan *outsourcing* memiliki kendala dalam menerima data lamaran melalui pengiriman surat atau *email*. Kendala tersebut dikarenakan surat lamaran tidak langsung sampai ke perusahaan *outsourcing* bila melalui pengiriman surat dan berkas lamaran yang melalui *email* bisa mengalami kerusakan data.

Mengatasi hal tersebut sekiranya pembuatan *website* penerimaan *outsourcing* menjadi solusi yang layak dilakukan. Dengan menganalisis sistem penerimaan yang sedang berjalan secara konvensional kemudian mengambil proses pengiriman berkas lamaran dan seleksi lamaran ke bentuk rancangan aplikasi. Maka proses penerimaan *outsourcing* lebih cepat dan efisien dengan menggunakan *website*.

Website yang dibuat akan menggunakan *framework Yii*. *Framework Yii* merupakan *framework* pemrograman umum *Web* yang bisa dipakai untuk mengembangkan semua jenis aplikasi *Web*.

Kata Kunci : *website, framework yii, outsourcing, pengiriman data lamaran, perusahaan outsourcing*

ABSTRACT

Recruitment, outsourcing is done by the outsourcing company has difficulties in receiving data application delivery mail or email. These constraints cover letter indirectly due to the outsourcing company if through mailing and e-mail application file that could damage data.

Overcome it if it were making the website acceptance outsourcing becomes feasible solution. By analyzing the reception system that is running conventionally then take the application file delivery process and selection of applications to the design of the application form. Then the admission process outsourcing more quickly and efficiently by using the website.

Website created will use Yii framework. Framework Yii is a common Web programming framework that can be used to develop all kinds of Web applications.

Keywords: website, yii framework, outsourcing, data transmission applications, outsourcing companies
