ABSTRACT

The purpose of this study was to determine the effect of student interest in learning media tamplate powerpoint presentation to a skill.

This research uses survey method with explosive associative causal level which is used to determine the extent of the causal relationship of the influence of student interest in learning media skills tamplate PowerPoint presentations to students. The approach used in this study was non-experimental quantitative approach, at SMA 16 Bandung population in this study is a class X IPS 2. The sample used is calculated by the formula slovin total of 32 students, conducted two data collection techniques, namely data collection questionnaire and survey . Prior to data analysis, the validity and realibility test is performed. It is known that the value of the distributed questionnaire data is valid and realible. Were analyzed using analysis of normality hypothesis testing, simple linear regression coefficient R Square .594 determinant with data analysis using data processing assistance through SPSS version 18.0.

The survey results revealed that there is the influence of the use of learning media to a skill tamplate powerpoint presentation. This can be demonstrated by (1) there is the effect of using powerpoint tamplate shown by test calculations simple linear regression equation $Y = 1.388 X + 11,784$ which means that every occurrence of the increase amounted to 11.784 powerpoint tamplate media will be projected increase of 1,388 students' presentation skills. (2) occurs quite strong correlation between learning media skills tamplate powerpoint presentation to the students. Great contribution made by the variable of learning media tamplate powerpoint views of R Square. Based on data obtained R Square 0.594 which means that the effect of media tamplate powerpoint 59.4%.

The conclusion in this study were (1) The application of learning media by using PowerPoint instructional media tamplate to do well on the course from the material, especially economic cooperation. (2) Student presentation skills on economic subjects in class X IPS 2 in SMAN 16 Bandung showed good results. (3) There is a PowerPoint instructional media keterarikan influence on students' presentation skills on economic subjects in class X IPS 2 at SMAN 16 Bandung.
