**ABSTRACT**

*Identifying is the decomposition of the elements contained in a text. Talking stick learning method is a learning model designed to measure the mastery of subject matter using stick media. Related to the definition the authors are interested to conduct research on "Identify Values Learning Contained in the Text of Folklore (Hikayat) Using Talking Stick Methods In Students of Class X SMAN 1 Rancaekek Academic Year 2016/2017". The author formulated Issue could the authors plan, implement, and assess the learning process to identify the values contained in folklore (hikayat) using the talking stick method in students of class X SMAN 1 Rancaekek, could the students of class X SMAN 1 Rancaekek identifying the values of life contained in folklore (hikayat) precisely?; And is it effective to use talking stick model in learning to identify the values of life contained in folklore (hikayat)? This study aims to determine the ability of authors in planning, implementing, and assessing the learning of identify the values of life contained in the text of folklore (hikayat) using of talking stick method, the ability of learners to identify the text of folklore (hikayat), and effectiveness The use of talking stick method in learning to identify the text of folklore (hikayat). The method use by author in this research is quasi experiment method with literature studies, observation, trials, test and analysis. The results of the research is the average value of the assessment result of planning and learning implementation of 3.47 Value is good category (B). Furthermore, seen from the average pretest value of 70.45 and post test of 91.89. Achieved an increase in learning with post test greater than pretest,  $91.89 \geq 70.45$  and pretest and post test averages of 21.35. Finally, there is evidence of the results of manual statistical calculations with  $t$  count  $\geq t$  table, is  $6.82 \geq 2.04$  at 95% confidence level, and  $d.b$  of 37. Based on data from the research, the authors concluded that the study of learning to identify the values of life Which is contained in the text of folklore (hikayat) using talking stick method in class X SMAN 1 Rancaekek, has been implemented and managed well.*
