ABSTRACT

Writing is one of the inseparable skills for student development in thin-king. Methods of observation nets idea is a mind mapping technique. In connection with that, the authors interested in learning research exposition text constructs using nets no idea p class X SMA Sumatra 40 Bandung in the academic year 2017/2018. The problems that the authors propose is (a) Can the author planing, implement, and assess learning to construct an exposition text using the observation idea nets in class X SMA Sumatra 40 Bandung? (b) Can the class X SMA Sumatra 40 Bandung constructing exposition text properly? (c) Effective method of obser-vation of ideas webs applied in learning to construct exposition texts on high school students Sumatra 40 Bandung? The research method that I use is pre-experimental design (nondesign) with research techniques literature study, observation, testing and analysis. The results of his research as follows. *1)* The author is able to plan, execute, and assess the learning of the text of the exposition by using the method of idea webs on students of class X SMA Sumatra 40 Ban-dung. This is evidenced by the results of the average assessment of planning and implementation of learning amounted to 3.60. The ability of the author is very good category. *2)* Students class X SMA Sumatra 40 Bandung capable of constructing the exposition text using nets ideas. It is evident from the average value of pretest 21.75 and the average value posttes 75, 04. This value indicates that an increase of 53.29. *3)* The method of the idea webs effectively used in constructing learning exposition text. It is proved from the results of statistical calculations with the results of $_{the\ t}$ $t = 14.4 > T_{table}$ 2.03 at the 95% confidence level of 5% significance level and degrees of freedom 23. Thus the method is effective ideas nets used in constructing embelajaran exposition text. Thus, the authors conclude that the method of the idea webs This right is used in constructing the text exposition learning in class X SMA Sumatra 40 Bandung.

Keywords : The web of ideas, rules, learning, exposition texts
