

## **ABSTRACT**

*The review is a summary of the assessment of a work. Short story according to his physical form is a short story. Lectora inspire media is an interactive learning media that usually refers to digital products and services on a computer-based system. In this regard, the authors are interested in conducting research on "Learning to Construct A Review of Short Stories Using Lectora Inspire Media in Class XI SMAN 17 Bandung Lesson Year 2016/2017".*

*Issues that the author formulated are: 1) Can the authors plan, implement, and assess learning to construct a re-sensi of a short story by using media lectora inspire in class XI SMAN 17 Bandung academic year 2016/2017 ?; 2) Can the students of class XI SMAN 17 Bandung construct a review of short stories correctly and correctly ?; And 3) effective lectora inspire media applied in learning to construct a review of a short story in class XI SMAN 17 Bandung ?.*

*This study aims to determine the ability of authors to plan, implement, and assess learning to construct a review of short stories using lectora inspire media, the ability of learners to construct a review of short stories, and the effectiveness of lectora inspire media used in learning to construct a review from Short stories on students of class XI SMAN 17 Bandung. The method that I use in this research is quasi experimental research method or quasi experiment with research technique of literature study, observation, test, test and analysis. The results of his research is the assessment of learning planning results of 3.70 and the implementation of learning amounted to 3.68 with an average cumulative value of 3.69 The value is classified as either (A). Furthermore, seen from the average pretest value of 39.35 and the average postes value of 82.1. Achieved an increase in learning with postes greater than pretest,  $82.1 \geq 39.35$  and pretest and postes averages of 42.66. Finally, there is evidence of the results of manual statistical calculations with  $t$  count  $\geq t$  table, ie  $20.21 \geq 2.04$  at 95% confidence level, and  $d.b$  of 29.*

*Based on data from the study, the authors concluded that the study of learning to construct a review of a short story using the media lectora inspire in class XI SMAN 17 Bandung, has been implemented and managed well.*

*Keywords: Learning, constructing, reviews, short stories, media lectora inspire.*
