ABSTRACT

Writing is one aspect of language that is productive. Cooperative integrated reading method of composition is an innovative learning method that is increasingly developed today. The learning method is carried out by way of groups. Therefore, the authors are interested in conducting research entitled "Learning to Produce Short Story Text Based on Character by Using Cooperative Integrated Reading Composition Method at Class XI SMA Kartika XIX-1 Bandung academic year 2017/2018". The formulation of this problem involves the authors' ability to plan, implement and evaluate learning to produce short story text based on character education, learner's ability to produce short stories based on character education, and the effectiveness of cooperative integrated reading composition method in learning to produce short stories based on education Character at class XI SMA Kartika XIX-1 Bandung. The research method used by the writer is a quasi-experimental method with research technique of literature review, observation, trial, test, and analysis. The results of the research have shown that success. The authors were able to plan, implement, and assess the learning of producing short story text based on character education, can be proved by the results of the Indonesian teacher's assessment of the preparation and implementation of learning. The authors get an average score of 3.4 in planning and implementing learning to produce short story-based text character education. Learners are able to produce short story text based on character education, can be proven from the initial test results with the average 61.80 and final test results with an average of 77.47. The difference shows the difference of 3.65 resulting in an increase from the initial test and the final test of a large 3.65. Cooperative integrated reading composition method effective use at class XI SMA Kartika XIX-1 Bandung can be proven from the results of statistical calculations by showing $t_{hitung} > t_{table}$, ie $3.93 > 2.04$ in 95% confidence level with 29 degrees of freedom. Thus, the authors concluded that the study's research showed success.

Keywords: Learning, producing, short story text based on character education, cooperative integrated reading composition method.
