**ABSTRACT**

*Researchers are interested in doing research at SMP Angkasa Lanud Husein Sastranegara. The formulation of the problem that the researchers propose is; 1) Can the researchers carry out the lesson of retelling the contents of the legend by using hand puppet media in class VII SMP Angkasa Lanud Husein Sastranegara? 2) Can the learners in class VII carry out learning activities retell the contents of the legend? 3) effective hand puppet media applied in learning to retell the contents of the legend of class VII students of SMP Angkasa Lanud Husein Sastranegara? This study aims to determine the ability of the author, the ability of learners and effectiveness of puppet media in learning retelling the contents of the legend in class VII SMP Angkasa Lanud Husein Sastranegara. The research method that the researcher uses is a pre-experimental method with a single-group end-test pre-liminary test technique. The results of his research as follows. Researchers are able to plan and implement the lesson retelling the contents of the legend by using hand puppet media on class VII students of SMP Angkasa Lanud Husein Sastranegara. The result of the planning value is 4,0 and the implementation is 4,0. The students of class VII of SMP Angkasa Lanud Husein Sastranegara were able to retell the contents of the legend. This is evident from the average value of pretes that is 55 and the average postes value is 75,3 so there is an increase of 20,3. Hand puppet media is effectively used in retelling lessons using hand puppet media. This is evident from the results of calculations showing statistical counts with  $t_{count} \geq t_{table}$  results, ie  $8,75 \geq 2,04$  in 95% confidence level, and db of 27. Based on that fact, the researcher concludes that all the researchers formulated in this study is acceptable.*
