

ABSTRACT

The title of this research "The Influence Model Of Learning Cooperative Learning Type Of Think Pair Share against liveliness student learning on subjects of economic sub subject manajemen in class X MIPA 4 SMA Pasundan 2 Bandung. The development of a nation is closely related to the issue of education. Education is a process understanding, and ways of behaving according to need. The purpose of this research is to know the application of cooperative learning model of think pair share type, student's learning activity and to know the influence of cooperative learning model of think pair share type toward student's learning activity in economy subject in SMA Pasundan 2 Bandung (case study of X MIPA 4 students in SMA Pasundan 2 Bandung). The method used in this research is survey. The sample in this study is the students of class X MIPA 4 in SMA Pasundan 2 Bandung, amounting to 40 students. Analysis of the data used is the analysis of the data verification by calculating the average score with the help of IBM SPSS Statistics Version 21.0. The results of recapitulation of average score of respondents' responses about cooperative learning model of think pair share type amounted to 3,90 (78%) while the activity in learning amounted to 3.87 (77%). Thus it can be concluded that the responses of respondents to Audiovisual learning media and interest in learning "Good". Based on data analysis that has been done, then the effects of the application of research results obtained cooperative learning model of think pair share type that can be seen from the calculation of the coefficient of determination with the value of R Square of 0.441. It is stated that the variable X has an influence of 44,1% on variable Y and the remaining 55,9% is influenced by other factors. Factors that give influence to variable Y as much as 41,9% caused by indicator of variable X form of learning media function and step cooperative learning model type think pair share. In closing, the authors convey the suggestion to the reader if there are students who tend to have passive characteristics, teachers should use a variety of interesting learning models. one of them uses cooperative learning model type think pair share. because this way can make studens more active in the laernng proscss.

Keywords: Cooperative Learning Model Type Think Pair Share, Activity Laerning.
