

ABSTRACT

The title of this study "Effect of Discussion Method Based Audio-Visual Against Student Interest in Learning Central Banks and Payment Systems Case Eyes IIS 2 Economy Class X SMAN 1 Parompong". The development of a nation is closely related to the issue of education. Education is a process with certain methods so that people acquire the knowledge, understanding, and ways of behaving according to need. The purpose of this research is to know the application of audio-visual based discussion method and student's interest in learning central bank and payment system. Case study on economic subjects class X IIS 2 SMAN 1 Parompong and to know the influence of audio-visual based discussion method of student interest in learning central bank and payment system. Case study on economy class X IIS 2 SMAN 1 Parompong. The method used in this research is survey. Subjects in this study were students of class X IIS 2 SMAN 1 Parompong which amounted to 38 students. Analysis of the data used is the analysis of the data verification through calculation of average (mean) score with SPSS 21.0 for Windows release. Result of research of recapitulation average score of respondent responses about audio-visual learning media equal to 4.02, whereas concerning student's learning interest equal to 4,01, hence can be concluded that respondent responses to audio-visual learning media and study interest "Very Good" . Based on data analysis that has been done then obtained the results of research influence the application of audio-visual learning media is the coefficient of determination R Square of 0.650%. It is stated that the variable X has an influence of 65% on variable Y and the remaining 35% influenced by other factors. Factors that give influence to the Y variable as much as 65% is caused by the indicator variable X in the form of learning media functions and the advantages of audio-visual media. The conclusion of the research is acceptable, as the end of the study, the authors suggest if they have students who tend to have passive characteristics, teachers should use interesting variations of methods combined with audio-visual learning media that is video playback related to the subject matter that will be delivered because of this way Can make students more interested to learn and will improve student learning outcomes.

Keywords: *Audio-Visual based discussion method, Student Learning Interest.*
