

ABSTRAK

As a country which has tens of thousands of islands and marine areas are very broad, condition RI Alutsista defense and ideally should have an army with sophisticated weapons systems nan-date. At the very least, the completeness of such a State can be calculated in a region. The existence of a strong army capable of bringing deterrent effect (deterren effect), at least in the neighboring countries. Budget constraints, especially the form of post defense, a classic reason for the difficulty the government to build and strengthen its armed forces into seideal possible. In an effort to keep the borders (maritime) national, Indonesia also needs a fleet of sea-effective defense, large and sophisticated. Defense industry is one of the vital components of defense capabilities. Therefore, the development of Indonesian State defense forces should be increased through cooperation with developed countries. One of them with the Russian state. Combat equipment to be purchased by Indonesia from Russia has a number of advantages including the deterrent power of the technology and capabilities that suit your needs. And Indonesia will continue to work to improve the defense and security through cooperation with Russia, until the goal is achieved the two countries.

The purpose of this study is to describe the Indonesia-Russia cooperation in the field of armaments and its impact on increased defense and security in Indonesia in 2003-2009. This research uses descriptive analytical method is a method that aims to illustrate, describe how far Indonesia's efforts to enhance defense and security. And analytical methods of historical research methods specific to a situation and the development of a phenomenon that occurred in the past by collecting data and facts as well as its development, in this case about the cooperation between Indonesia and Russia related to cooperation in the field of weaponry.

Although in implementing its objectives, Indonesia still face the many obstacles and barriers, but with the transfer of technology which made Indonesia to Russia, can help in improving Indonesia's defense and security. So that later can upgrade Indonesia Alutsista, and transfer of technology to the independence of Indonesia's defense facilities.
