ABSTRACT

Fabel is a text that aims to convey lesson or suggest moral to the reader in a fun and interesting way. Discovery learning method is an invention-based learning method. The author is interested in conducting a study of Learning to Identify Intrinsic Elements of Plot and Character Oriented Fables with Discovery Learning Methods in 7th Grade Students of Pasundan Junior High School 4 Bandung Academic Year of 2017/2018. The problems stated in this research as follow: (1) Is the writer able to plan, implement and assess learning to identify the intrinsic elements of plot and character oriented fables with discovery learning methods in students of seventh grade Pasundan Junior High School 4 Bandung?; (2) Are seventh grade students of Pasundan Junior High School 4 Bandung able to identify intrinsic elements of plot and character oriented fables with discovery learning methods?; (3) and Is discovery learning method effectively used in learning to identify intrinsic elements of plot and character oriented fables? This research used quasi-experimentation with literature study research techniques, observation, trial, test and analysis. The results showed the average value of planning and implementation is 3.44, the average value of pretest is 31.42 and the average value of posttest is 82.65 while the difference between pretest and posttest is 51.23. The results of statistical calculations proved showed $t\text{-value} > t\text{-table}$ with value of $16.33 > 2.05$ at 95% confidence level with a significant level of 5% and db of 26. Based on these results the authors conclude that the implementation of learning methods identifying the intrinsic elements of plot and character oriented fables with discovery learning methods on seventh grade students of Pasundan Junior High School 4 Bandung have been succeeded.
