ABSTRACT

The research entitled "Learning to Analize Text of Persuasion Based Structure with Method Pair Check at Class an VIII SMPN 1 Limbangan Model as Efforts to Improve Critical Thinking Ability Year 2017/2018" This aims to know effective or not Pair Check method is used in learning to analize text of persuasion. The formulation of problem that writer ask in this research is as follows (1) Can writer the planning, implement, and evaluate learning to analize text of persuasion on control class and experimental class? (2)There is any difference in the ability of learners in reviewing the text of persuasion before the treatment on control class and experimental class?(3) There is any difference in the ability of learners in reviewing the text of persuasion after the treatment on control class and experimental class? (4) Increase the studen't ability to think critically after learning the text of persuasion using the method of Pair Check on control class and experimental class?. The results of this study are as follow. (1) The writer able to planning, implement, and evaluate the learning to analize tzt of persuasion based structure with method Pair check. This can be proved from the average result of planning assessment and implementation of learning amounted to 3,6. (2) This is difference in the ability of learners in the experimental class and control class before being given treatment. This can be proved from the average value pretes on experimental class that is 33, the while on control class from the average value pretes that is 16,04. (3) This is difference in the ability of learners in the experimental class and control class after being given treatment. This can be proved from results of calculation of significance by comparasion t_{hitung} experimental class $>$ t_{hitung} control class 21,71 $>$ 11,96. Other that, it is the average value postes on experimental class that is 95,54, the while on control class from the average value postes that is 51,33. (4) The ability critical thinking improve do after learning to analize text of persuasion based structure. This can be proved from the average value critical thinking ability this is 83,76.

Keyword : Learning, analize, text of persuasion, method Pair Check, ability.
