ABSTRACT

The study of Indonesian Language in the Curriculum 2013 requires the teachers to be more creative and innovative in choosing and using model or learning method. The model or learning method used should be able to make students become more active in learning activities, so that can create student-centered learning. In this research, the authors used a learning model of think pair share to create student-centered learning on the study of evaluating text of negotiation which is oriented to persuasive expression on the 1st grade student of SMAN 15 Bandung. The purpose of this research is to find out and observe the ability of authors in planning, practicing, and assessing the study of evaluating text of negotiation which is oriented to the persuasive expression with think pair share model on the 1st grade student of SMAN 15 Bandung, knowing and testing the ability of the 1st grade student of SMAN 15 Bandung in evaluating text of negotiation which is oriented to the persuasive expressions with think pair share model, and to find out the effectiveness of using think pair share model in the study of evaluating text of negotiation which is oriented to the persuasive expression on the 1st grade student of SMAN 15 Bandung. This research was conducted by using quasi experimental method with the research design is One Group Pretest-Posttest Design. The techniques of data collection are documentary study/literature review, test, and observation. The result of this research can be seen from result of learning planning equal to 3,88 and result of learning implementation equal to 3,82. Furthermore, it can be seen from the result of the pretest with the average score of 50,29 and the result of posttest with the average score of 64,57. The result shows the improvement of the 1st grade students of SMAN 15 Bandung for 14,28. Moreover, it can also be seen from the statistical test of $t_{count} > t_{table}$, which is 6,873 > 1,703 with the value of significance 0,05 and degrees of freedom 27. Furthermore Sig. value (2-tailed) shows the result of 0,000 which means that the value of significance < 0,05 at the level of credibility 95%. According to the result of data analysis which has been done can be concluded, that the study of evaluating text of negotiation which is oriented to the persuasive expression with think pair share model on the 1st grade students of SMAN 15 Bandung successfully executed.
