ABSTRACT

Political awareness concerns one's knowledge, interest and attention to society and politics. Political awareness on the students is the role of students in supervising or correcting the policies and behavior of the government during the holding of governmental power. Today, students' political awareness is always interpreted as an awareness of practical politics but the actual form of political consciousness is very diverse and can be realized through discussion of social, economic, and even problems that arise in society. In analyzing students' political awareness then how far the role of Pancasila and Citizenship Education course (PPKn) in giving understanding of political awareness to the students. The purpose of this study is to test the hypothesis proposed by the author that "in the course of Education Pancasila and Citizenship given the understanding of the role and position of students in society then the level of awareness of students in the millennial is good" which is assumed if the course Education Pancasila and Citizenship (PPKn) can increase students' political awareness. The method used is descriptive qualitative with data collection techniques by questionnaire or questionnaire distribution, non structural interviews and documentation. The resulting data is then analyzed qualitatively presented in the frequency table that serves to explain the subject of Education Pancasila and Citizenship (PPKn) and awareness of students in the era of millennial which then changed to the diagram to see how far the comparison of the data through the image.

Keywords: Pancasila and Citizenship Education (PPKn) and Political Awareness
