ABSTRACT

This study aims to improve student learning aoutcomes consisting of three aspects, namely, cognitive, affective, and psikomotor by using discovery learning model in the sub-theme of Cultural Diversity of my Nation. This research was conducted in the fourth grade of SDN 033 Asmi Bandung. This Research is motivated of students who are less active and lacking in enthusiasm in following learning and low students learning outcomes, because teachers often use lecture methods that tend to be monotonous and have not used discovery learning model. This research uses classroom action research methods (PTK) whict are carried out in 3 cycles by applying a discovery learning model consisting of 6 phases, namely giving stimuli, problem identification, data collection, data processing, verification and drawing conclusions. Subjects in this study are students of grade IV SDN Asmi Bandung with a total of 28 students consisting of 12 male students and 16 female students. The results of research that shows an increase in the value of cognitive, affective and psychomotor aspects. Students' learning outcomes cognitive aspects in the first cycle to get 46.42% of students who complete KKM, cycle II obtained 71.42%, and 92.85% III cycle. Students 'learning outcomes affective aspects of students' caring attitude cycle I get 41.01% students complete, cycle II get 62.49%, and cycle III get 85.71%. In the students' attitude attitude, cycle I got 39,28%, cycle got II 67,85%, and cycle III got 91,06%, student learning result of psychomotor aspect on student skill of cycle I get 37,47% student complete, cycle II obtained 66.01%, and the third cycle reached 87.50%. This shows that the application of discovery learning model can improve the attitude of caring, courteous, and student learning outcomes on subtema Cultural Diversity My Nation in class IV SDN 033 Asmi Bandung.
