ABSTRACT

This research was conducted in class IV in National Elementary School Student Citalem District Bandung Barat school year 2018/2019 . This research aims to improve learning students on theme Indahnya Kebersamaan Subtema Keberagaman Budaya Bangsaku and based on the situation of students who are less active, lack of caring and polite attitude low students learning outcomes because teachers often use conventional model namely lectures and have not applied the Discovery Learning model. This study uses Classroom Action Research (CAR) method with a cycle system consisting of the stages of planning, implementation, observation and reflection. This research was carried out in 3 cycle, each cycle consisting of 2 learning. The results of study indicate an increase in caring attitudes, polite attitude, skills and students learning outcomes. In the cycle I the percentage of the results of the polite attitude of student is 73% with enough categories. In the cycle II it was 80% in the good category and in the cycle III it was 87% in the good category. In cycle I the percentage of students caring attitude was 73% with enough categories. In cycle II it was 80% with good category and in cycle III 85% with good category. In cycle I the percentage of students skills was 72% with enough categories. In cycle II it was 77% with enough category and in cycle III 83% with good category. In the cycle I the average assessment of learning outcomes is 64 with a percentage of 45% learning completeness. In cycle II the average assessment of learning outcomes is 73 with a percentage of 69% learning completeness. And in cycle III the average assessment of learning outcomes is 80 with a percentage of 90% learning completeness. Based on the analysis of the research data it can be concluded the the application of the Discovery Learning model can improve learning of IV class students outcomes on theme Indahnya Kebersamaan Subtema Keberagaman Budaya Bangsaku.
