

ABSTRACT

Influence of Edmodo Learning Media to Student Learning Result (Case Study on Economic Subject of Cooperative Material of Class X IPS 4 SMAN 1 Soreang Teaching Year 2017/2018). The current technological developments have much influence in the learning process. The involvement of information and communication technology is very necessary in helping the learning process, besides the education that can not be detached from the relationship with technology, also useful in facing the world of work. One type of E-Learning that is widely used in education is Edmodo Social Network. Conventional learning that feels boring makes learners often sleepy during the learning process takes place. From the problem of the researcher make problem formulation that is how big influence of student learning result after use of edmodo learning media (Virtual Class). This study aims to determine the effect of learning media edmodo on student learning outcomes with research methods used are Pre-Experimental Designs (Nondesigns) One Group Pretest-Posttest. The subjects of this study are students of class X IPS 4 SMAN 1 Soreang with Object 35 people. Data retrieval technique with posttest provision to know learning outcomes after using edmodo media in Economic Learning Basic Competence Describe cooperatives in Indonesian economy. The result of this research is paired samples test with significant level of 5% (0.05) got sig value. (2-tailed) of 0.000 <0.05 So it can be concluded that there is a significant difference or an increase in learning outcomes. With the influence of independent variable that is Learning Media Edmodo (X) to dependent variable that is Learning Result (Y) is equal to 20,5% with enough interpretation and Average N-Gain equal to 0,67 which is included to mean interpretation (0,30 <g <0.70). This shows the result of student learning with edmodo learning media is higher than learning which is only done in the classroom.
