ABSTRACK

The reseach was conduction in class IV SDN Dukuh Sebrang Ciasem Subdistrick Regency Of Subang with the member of 29 students consists of 17 male students and 12 female students, this reasech which aims to improve student learning class IV on Sub Theme Unity in Diversity. The lack of student learning result that include affective, cognitive and psychomotor aspects are still under KKM because teachers who often use methods tend to be monotonous and have not used the Discovery Learning model. This study uses Classroom Action Research (CAR) method with a cycle system consisting of planning, implementing, observing, and reflecting stages that are carried out in three cycles. The results of research on student learning result obtained from three aspects of affective aspects, cognitive, and psychomotor. It shows that in cycle I, the students reach the attitudes of affective attitude (affective) 44,8% while 74,4% attitude of manners, knowledge (cognitive) equal to 51,7%, and skill (psychomotor) 42,3%. In the second cycle, the improvement of the result of cycle I has increased the percentage of the attentiveness (affective) attitude by 65.5%, while the attitude is 79,3%, the knowledge (cognitive) is 72,4%, and the skill (psychomotor) of 79.3%. In the third cycle action which is an improvement of the results in the second cycle experienced an increase in the percentage of completeness (affective) caring attitude of 100% while polite attitude reached 100%, knowledge (cognitive) by 100%, and skills (psychomotor) by 100%. Based on the results of the study it can be concluded that the application of the Discovery Learning model is proven to improve the learning outcomes of fourth grade students of SDN Dukuh Sebrang Ciasem Subdistrict Regency of Subang on the theme of Unity in Diversity. And than the model of Discovery Learning can be used as one of the learning models to be applied in learning.
