

ABSTRACT

This study, entitled "Application of Learning Model Cooperative Learning Type Talking Stick To Improve Student Learning Outcomes in Economy Studies Quasi Experiments On Material Concept Management Class X MIPA SMA Pasundan 7 Bandung". Motivated by the lack of student learning outcomes. The purpose of this study is to determine the application of learning models Talking Stick and student learning outcomes in economic learning sub theme management concepts in class X MIPA SMA Pasundan 7 Bandung.

Location of research at Pasundan University class of 2014. The model used in this study is Quasi Eksperimen, which is select Nonequivalent Control Group Design. Subjects in this study were the students of grade X MIPA SMA Pasundan 7 Bandung which amounted to 31 control class students and 31 students of experimental class. Technique of collecting data by way of pretest and posttest. Analysis of data in use in the help with SPSS release 23.0 for Windows. Hypothesis or research question reads the application of cooperative learning model type talking stick can improve student learning outcomes in SMA Pasundan 7 Bandung.. Based on the findings and data processing in the field shows that the student learning outcomes obtained from the posttest result in the form of multiple choice. The results of this study indicate differences in learning outcomes of 85.48 for the experimental class and 71.77 for the control class.

In conclusion the research hypothesis that reads "Application of Cooperative Learning Model Talking Stick Type To Improve Student Learning Outcomes of Economic Subject Class X MIPA SMA Pasundan 7 Bandung" as the end of the study the authors convey suggestion to learners expected to develop intellectual and can be more active, for teacher alternative in learning. For schools, is expected to be a source of information in improving the ability to think critically on the learning outcomes of learners. For the principal, is expected to be useful for educators and can help improve the ability to think critically to learners. For further researchers For other researchers in the field of education can conduct research similar to the model, media and different learning methods in order to obtain various alternatives to increase understanding of learning on the next subject.
