ABSTRACT

This study aims to improve caring attitudes and student learning outcomes through the use of learning models Problem Based Learning in the theme 1 beautiful togetherness sub theme 1 cultural diversity of my country in class IV SD Negeri Linggar 01 rancaekek subdistrict bandung regency. This research is motivated by the fact that students in grade IV have not been achieved due to the way teachers teach have not used other learning models that can foster student motivation in learning. Implementation of class actions (PTK) is done 3 cycles and each cycles is done with 2 meetings and at each end of the cycles carried out observations to determine the results of improved caring attitude and student learning outcomes. The results of the study can be explained that the category of the presentation of an attitude of care a student to lose their observations cycles I detailing learning to promote disorder to 1 achieved a score of as much as 26% and the learning process 2 as much as 40%, in cycles II learning 3 have value of 48% and learning 4 of 60%, while in the cycles III increase at learning 5 received a score of 78% and learning 6 as much as 90%. In addition, the increase occurred in student learning outcomes. In the first cycles I the leaning outcomes of the learners are complete if the percentage of about 40%, in the second cycles II increased 70%, and in the third cycles has increased as much 88% who have reached KKM which has been specified that is 70. That the use of Problem Based Learning model of learning can improve caring attitude and student learning outcomes on thematic learning theme 1 beautiful togetherness sub theme 1 cultural diversity of my country in class IV SD Negeri Linggar 01 Rancaekek Subdistrict Bandung Regency.
