ABSTRACT

Writing Poetry with Attention to Building Elements Focusing on Diction is one of the lessons that helps students in the process of developing creativity in basic thoughts, feelings, and ideas. Cycle Learning Learning Method is a method to improve knowledge of students. In connection with these matters, the authors conducted a study that introduced texts based on the mind builder on diction in class X Puragabaya Vocational School Bandung. Need things in this study: (1) can researchers do writing learning activities by paying attention to those who build education in schools, for class X students in the 2017/2018 school year; (2) can the students in the experimental class be carried out by paying attention to the constructor's characteristics when diction using the learning cycle learning method in class X year 2017/2018 school; (3) effective cycle learning method is applied in writing learning by paying attention to the Disk builder number on diction. The research objectives used are to find out what can be done, namely to achieve what can be done; knowing the ability of class X students in the learning; and the effectiveness of learning methods that are The research method that I use is the experimental method, the design of the research is experimentally correct, with research techniques namely literature study, analysis, tests and analysis. The results of the research results are as follows: (1) the average average and process discipline obtained by the author is 3.95. Free from 3.9, and the implementation value is 3.95. (2) the average value of pretest is 50.15 and the average posttest is 90.78. (3) Learning Cycle learning methods are more effective than the Take and Give method. This is evidenced by the results of the acquisition of index data, obtained the results of respondents in the experimental class 81.25% in the high category, while in the control class the majority of respondents were as much as 55.17%. The suggestions are as follows. Indonesian Language Teachers should create creative learning, innovative, and fun so that students can learn actively, creatively, and think critically, one of them by using learning methods or techniques that are appropriate to learning and can motivate students to learn.

Based on the results of the study, the authors concluded that learning to write with the cycle learning method can be used in learning, the Disk builder class on diction in class X Puragabaya Vocational School in Bandung.

Keywords: Writing Content based on building elements focused on input, the cycle learning method.
