This study is entitled "The Role of Extracurricular School Security Patrols in Building Traffic of Smkn 2 Students in Bandung (Qualitative research at SMKN 2 Bandung)". Requires research on the role of School Security Patrol Extracurricular in improving order, student traffic in SMKN 2 Bandung. The specific purpose of this study is to find out the work program or activities of school security patrol extracurricular activities that can build orderly awareness of student traffic. The method used in this study is qualitative research. The subject of this study was a member of the School Security Patrol Extracurricular and the object of this research was an Extracurricular School Security Patrol. The instruments used were interviews, questionnaires, daniri. Distribution of 20 questionnaires. One of the data analysis was carried out in three steps: (1) preparation, (2) tabulation, (3) the application of data in accordance with the research approach. Data analysis can use three activities that occur quickly: (a) word reduction (b) Data Display and (c) Cut conclusions / Verification. With the results of research that the Role of Student School Security Extracurricular Patrols can be more profound in traffic such as: cursing SNI helmets, not ladder carelessly, and students more than just discussing about school. The latest research, a study that states the conclusion that the awareness of students in the activities of school security patrol activities is quite diverse, when viewed from the awareness of all students can say still lacking, because not all students about extracurricular activities in school. Will he see from the students who become School Security Patrol Extracurricular, the awareness of the participants for all activities that have been programmed by School Security Extracurricular is very high, this is consistent with the results of interviews, all members of the School Security Patrol Extracurricular have high awareness in the context of each activity that has been programmed.
