ABSTRACT

This research is done because there are still many students who show less creativity and learning outcomes are still many under the KKM because teachers are still using the conventional model where teacher-centered learning (teacher center) in the learning process that causes low student learning outcomes. The purpose of this research is to improve creativity, and student learning outcomes on thematic learning theme of Animal and Animal Breeding of Animal Breeding Subtheme. This study uses a classroom research method consisting of three cycles. The subjects of this study are the third grade students of Bojongloa 6 State Elementary School, as many as 35 people consisting of 9 male students and 26 female students. The result of the research on the students' creativity cycle tends to be in the less favorable category whose average value is 52.85%. In cycle II, the tendency of student creativity increased in good category from the total number of students by 67.13%. In the last cycle or cycle III the creativity of almost all students increased by 84.28%. Learning outcomes in cycle I the number of students who complete the KKM as many as 17 people or as much as 48.57% and students who have not completed to reach the KKM as many as 18 students or equal to 51.42%. In cycle II the number of students who complete the KKM as much as 25 people or equal to 71.42% and students who have not completed the KKM as much as 10 students or 28.57%. In the third cycle the number of students who complete the KKM as many as 30 people or equal to 85.71% and students who have not completed to reach the KKM as many as 5 students or 17.28%. The conclusion in this research is the use of model Cooperative Learning Tipe Example Non Example can improve creativity and student learning outcomes on learning the theme of Animal Breeding and Plant Breeding Subtema Breeding Plant.
