

## ABSTRACT

### **Siti Maemunah. (2018) "The Relationship of Permissive parenting that Implemented by Parents to Juvenile Delinquency".**

Juvenile delinquency very attracting the attention in sorts of circles now, that mentioned happens a lot in Indonesian society. Juvenile delinquency is so harm for they self because it can harm their life and their future, the Juvenile delinquency can't be separated from wrong parenting from parents. Permissive parents so effect children become bad personalities and often involve in deviant behaviors.

This research tried to reveal how the relationship the permissive parenting parents to Juvenile delinquency, the background influence of parents' education on permissive parenting, what factors can influence Juvenile delinquency, and how the efforts made by parents and children to overcome Juvenile delinquency. This research uses a qualitative approach with descriptive methods, and data collection is done through observation, interviews, and documentation studies. This research aims as follows, 1) Knowing parenting that applied by parents. 2) Knowing the influence of parents' education background on permissive parenting. 3) Knowing the causes of Juvenile delinquency. 4) Efforts that have been made by parents and children to overcome Juvenile delinquency.

This research produced some findings, that parents in Karang Tumaritis Village trend to apply permissive parenting, because from the seven families studied there were four families who applied permissive parenting. Parents who apply permissive parenting in Karang Tumaris Village have a low education (no school). The factors that influence Juvenile delinquency in Karang Tumaritis Village consist from internal factors and external factors. Efforts to minimize the occurrence of Juvenile delinquency have been carried out by some parents and children in Karang Tumaritis Village, but many have not yet attempted it.

Keywords: Parenting, Permissive Parenting, Juvenile Delinquency
