ABSTRACT

The study is carried out to examine the impact of internal controls system on financial statement quality in the Indonesian government institution with case study in the National Library Agency. Hence, this study seeks to: (1) identify the implementation of internal control system in the Agency; (2) identify the quality of financial statement issued by the Agency, especially from the year 2009 to 2013; (3) measure the impact of the internal control system on the quality of financial statement issued by the Agency. Acquired from questionnaire distribution to selected employer working in Principle Secretary and Inspectorate Units at the Agency, this research employs quantitative method in form of simple linier regression. Result of the regression confirms that internal control system had a positive and significant impact on financial statement quality. The impact of this internal control system itself reached to 49,7%; while the rest were contributed by other factors, such as the obedience to the higher regulations and Government Accounting Standard. Therefore, in can be concluded that if the Agency implements its internal control system in good and consistent way, its financial statement would more qualified.
