Language skills are abilities that every writer must use in language. Language skills include listening, reading, writing and speaking skills. The author is interested in carrying out research in the form of improving language skills. The problem formulation that the authors propose are: 1) Can the author carry out learning activities identify elements of the news text that is read by using the investigation group method as an effort to improve learning outcomes and creativity for students of class VIII SMPN 1 Cikarang Barat in 2018/2019 school year? ; 2) Can the students of class VIII of SMPN 1 Cikarang Barat academic year 2018/2019 follow the learning to identify the elements of the news text read by using the investigation group method as an effort to improve learning outcomes and creativity ?; 3) Effectively the application of the investigation group method used in learning to identify the elements of the text that is read by using the investigation group method as an effort to improve learning outcomes and creativity for students of class VIII SMPN 1 Cikarang Barat in 2018/2019 school year? The results of the research that the authors did were: 1) The first hypothesis can be accepted. This can be proven by looking at the results of the assessment of Indonesian subject teachers at SMPN 1 Cikarang Barat. The author gets an average planning value of 3.55, the average value of the implementation is 3.71, then the cumulative value of planning and implementation is 3.65 and is included in the category; (A) 2) The second hypothesis can be accepted. This can be proven by the average pretest score of 44.75 and poster 80.50 with a mean of 35.25; 3) The third hypothesis can be accepted. This can be proved by the calculation of the t test that produces $t_{count} > t_{table}$ that is equal to $13.61 \geq 2.06$ with a confidence level of 95% and a degree to the load of 24. based on the data the authors conclude that the group investigation method very effective in learning to identify elements of news texts. Based on these data it can be concluded that the research that the author did was successful.
