ABSTRACT

Learning to write poetry is related to writing skills, namely writing poetry by paying attention to poetry building elements such as themes, diction, images, language style, appearance by using the writing in the here and now method which aims to facilitate students to write poetry. In connection with this matter, the researcher is interested in researching writing literary learning by paying attention to the building elements using the method of writing in the here and now in class X of Situraja Sumedang 1 Public High School in 2018/2019. The results of the research are as follows: 1) Researchers are able to plan, implement, and evaluate learning to write poetry using the method of writing in the here and now. This can be proven in the results of assessments given by Indonesian language subject teachers regarding planning and implementation of learning in students of class X IPS 2 and X IPS 3. The researcher gets an average value of planning and learning implementation of 3.65. 2) The learning outcomes of the experimental class students in poetic writing learning by observing the builder element are more improved than the control class students who use the discussion method with the results of the experimental class ranking amounting to $435.00 > 378.00$. Asymp Value. Sig. (-2 tailed) shows 0,000. The value is $0,000 < 0,05$, so the ability of the experimental class students is better than the control class. 3) The results of the test statistics in the Mann-Whitney (Gain) test above, we can know that the value of Asymp.Sig. (2-tailed) of 0,000 smaller than the value of 0.05. Therefore, the hypothesis is accepted. Thus there is a significant difference from the learning outcomes of students who use the method of writing in the here and now with the method of discussion in learning to write poems by noticing the building of poems.

Keywords: methods of writing in the here and now, writing skills, poetry learning.
