ABSTRACT

Indonesian language learning activities must be carried out effectively to be able to generate interest and attention of students in participating in learning. The author conducted a study with the title Learning Analyzing Short Stories Focusing on Educational Values Character Characterization and Characterization with Spontaneous Group Discussion Methods in Class XI of SMAN 1 Margaasih Academic Year 2019/2020. The formulation of the problems posed include (1) Is the writer able to plan, implement and assess learning activities analyzing the value of educational character characterization and characterization in short stories with the method of Spontaneous Group Discussion on class XI students of SMAN 1 Margaasih? (2) Are students of class XI IPS 1 XI SMAN 1 Margaasih able to analyze the value of character education education and characterization using the Spontaneous Group Discussion method? (2) Is the Spontaneous Group Discussion method effective in learning analyzing the value of educational character characterization and characterization in short stories in class XI students of SMAN 1 Margaasih?

As for the results of the average value of learning implementation the average value of learning is 3.98. The results of the Prates with an average of 36.33 and the results of the Post-test with an average of 83.83 this difference showed a difference of $83.83 - 36.66 = 47.17$, resulting in a ranking of Prates and Pascates of 47.17. This is evident from the results of statistical calculations with $t_{count} > t_{table}$, which is $14.38 > 2.82$ at a 95% confidence level, and a degree of freedom of 30. Based on these facts the authors conclude that learning research analyzes short stories focusing on the characterization of educational values and characterization with the Spontaneous Group Discussion method of class XI of SMAN 1 Margaasih 2019/2020 school year has been implemented and has been successful.
