

ABSTRACT

The title of this study: “PENGARUH KEMANDIRIAN BELAJAR TERHADAP HASIL BELAJAR SISWA PADA MATA PELAJARAN EKONOMI DI SMA YPKKP CIJERAH BANDUNG (Survey Pada Siswa/Siswi Kelas X di SMA YPKKP Cijerah Bandung)” with a background that is very important for a student because during learning at school. the independence of learning in this study is someone who has a high level of trust. Have their own awareness in overcoming problems and have a sense of responsibility for the tasks that have been given by the teacher. So that students are ready in the learning process and able to adapt to learning, especially on economic subjects. This study uses a quantitative approach, while the method used in this study is a survey, how to collect data using questionnaires and observations. The subjects in this study used a sample of 30 students of class X in YPKKP High School Cijerah Bandung. Analysis of the data used is descriptive and verification analysis of data through the calculation of the average (Mean) score, simple linear regression and coefficient of determination with the help of SPSS version 24 for Windows. The results of the study using descriptive analysis obtained a recapitulation of the average score with the responses of respondents regarding learning independence by 4.38 in the category of "Good" and regarding student learning outcomes of 75.27. Based on the data verification analysis that has been carried out obtained simple linear regression coefficients ($Y = 36,441 + 0,471 X$) can be explained if there is an increase of 1 in the learning independence variable it will improve student learning outcomes 0.471. While the contribution of the influence of the influence given by the learning independence variable on student learning outcomes on economic subjects based on the calculation of the coefficient of determination is 72.9% while the remaining results of the calculation 27.1 are influenced by factors outside the learning independence variable that were not examined in the study. As the end of the study, the author conveying Sara to students is expected to familiarize themselves with independent learning, not always depend on others, believe in themselves, and be able to control themselves so that learning outcomes in economic subjects can be optimal.

Keywords: *Learning independence, learning outcomes*
