**ABSTRACT**

*The title of this study is "Learning Constructs Focused Negotiating Texts on Complex Complexes of Offers Using Think Pair Share Models in Class X of Pasundan High School 2 Bandung City 2018/2019 Academic Year". The formulation of the problem that the author proposed is: (1) Writing skills are considered difficult, because they are not mastered by everyone, (2) Difficulties in class X students of Pasundan 2 Bandung High School in making negotiating texts focus on complex structure of offerings, (3) Application of learning models used by educators has not been able to make students active in the teaching and learning process. The population of this study consisted of 25 students who were students of class X of Pasundan 2 High School in Bandung City. Data collection in the form of learning test results carried out before and after the learning process (pre-test and post-test). The results of the research are as follows: (1) The author is able to plan, implement and assess the learning activities constructing the negotiating text focusing on the complex structure of the offer using the think pair share model in class X students of SMA Pasundan 2 Bandung. The value of learning planning constructing the negotiating text focuses on the complex structure of the offer using the author's think pair share model of 3.4 in the good category. In accordance with the assessment categories that have been set, the planning and implementation of author learning can be well stated. That is, the author can plan and implement, (2) Students of class X Pasundan 2 Bandung High School are able to write negotiating texts focusing on the supply structure. This is evident from the average value. The average score of the pretest is 31 in the very less category, while the average value of the post test is in the good category. So, the difference between the average pre-test and post-test scores is 81.48. These results prove that the ability to write negotiating text focuses on the offer structure of class X students of Pasundan 2 Bandung High School has increased, (3) The method of think pair share is effectively used in learning to construct negotiating texts focusing on complex structures of offer using think pair share models in class X students Pasundan 2 High School Bandung. This is evident from the results of statistical calculations with the results of  $t_{count} > t_{table}$ , which is  $9.80 > 1.71$  at a confidence level of 95%, a significant level of 5% and degrees of freedom 24.*

*Keywords: construct negotiating text, complex structure of offer.*
