

ABSTRACT

Information and Communication Technology, is a big umbrella of terminology that includes all technical equipment to process and convey information. Information and communication technology includes two aspects, namely information technology and communication technology. Information technology includes everything related to the process, use as a tool, manipulation, and management of information. the development of information and communication technology is very influential for students. However, information and communication technology has positive and negative impacts, depending on us as students using these information technology and communication tools. The role of parents and teachers in schools is highly expected to help students limit themselves using information and communication technology tools.

The formulation of the problem that the researchers proposed was whether students of class XI at SMAN 11 Pandeglang knew about the development of information and communication technology. How is the influence of information and communication technology on reading interest of class XI students of SMAN 11 Pandeglang 2018/2019? Are students of class XI SMA 11 Pandeglang know the negative and positive effects of the influence of information and communication technology developments?

This study aims to obtain answers to the problems above, which are generally to know the effect of the development of information technology and communication on reading interest in class XI in the library of SMAN 11 Pandeglang.

The research method that the researcher uses is descriptive method with observation and interview techniques. The research results are as follows:

In this era of increasingly sophisticated information and communication technology development students are very easy to read and learn through online libraries (e-books) that are on the mobile phone of students, but students must have knowledge of the development of information and communication technology, so participants

students are not wrong to use technological tools such as mobile phones, because there are so many negative and positive impacts of the development of information and communication technology, if students know what technology is developing, then students can choose and sort out what should be done and which should not be done .

Keywords: Development of information and communication technology
