ABSTRACT

This research was backed by the problem poor writing skills- persuasion text suggestion oriented learners. Efforts are being made to improve the writing skills of persuasion-oriented text suggestion on this research method using group investigation. A method of group cooperative learning strategy is the investigation that put students into groups to do the topic investigation. The method group investigation helps students to learn to solve a problem in learning to write text-oriented suggestions by way of persuasion work together in small groups. This research has been done at the SMP Nusantara Bandung. This study uses one group pretest-posttest research design, that is using pretest and posttest with the same assignment. As for the results of the research are: 1) The writer were able to plan, implement, and assess learning writing text-oriented suggestions using the method of persuasion group investigation in class VIII SMP Nusantara Bandung. This is evidenced from the average value is 3.4 of the learning implementation. 2) Learners in class VIII SMP Nusantara Bandung were able to follow a learning- persuasion writing text suggestion oriented. These evidenced from the average value at 23.85 pretest and 76.3 posttest results. These differences indicate a difference in $76.3 - 23.85 = 52.45$. 3) Group investigation method was effective for learning- persuasion writing text suggestion oriented in class VIII SMP Nusantara Bandung. This is evident based on statistical tests, known $t_{count} \geq t_{table}$, that is $4.73 > 1.729$. In the confidence level of 95%, a 5% significant level and 19 degrees of freedom.
