ABSTRACT

Based on the explanation, the authors are interested to conduct research with the title "Learning to Produce Text Pantun Using Contextual Teaching And Learning Methods on Students of Class XI SMA Negeri 1 Cikarang Utara Lesson 2017/2018". The formulation of the problem that the writer ask is: (1) Can the authors plan, implement, assess the learning of producing pantun text using the method of contextual teaching and learning in students of class XI SMA Negeri 1 Cikarang Utara? (2) can the students of grade XI SMA Negeri 1 North Cikarang produce pantun text correctly? (3) effective method of contextual teaching and learning is used in learning to produce pantun text on students of class XI SMA Negeri Cikarang Utara. The hypothesis that the authors formulated is as follows. (1) The author is able to plan, execute, assess the learning activities Producing Pantun Text Using Contextual Teaching And Learning Methods on Grade XI Students of SMA Negeri 1 Cikarang Utara. (2) The students of grade XI SMA Negeri 1 Cikarang Utara are able to produce pantun text correctly. Effective contextual teaching and learning method is used in learning to produce pantun text in grade XI students of SMA Negeri 1 Cikarang Utara. Based on the data processing research that has been done, the authors conclude things as follows The author is able to plan, implement, assess the learning activities Producing Pantun Text Using Contextual Teaching And Learning Methods on Students of Class XI SMA Negeri 1 Cikarang Utara. This is evident from the results of planning assessment and implementation of learning to classify the text structure of biographical stories using contextual teaching and learning method in Indonesian language teachers. The results of the writer's learning planning assessment is 3.6 with very good category (A).The students of grade XI SMA Negeri 1 Cikarang Utara are able to produce pantun text using contextual teaching and learning method. This is evident from the average value of pretest and postes. The average value of pretest is 1.1, whereas the mean value of postes 3,61. Thus, the difference between the pretest and posttest values is 2.51. Effective contextual teaching and learning method is used in learning to produce pantun texts in grade XI students. This is evident from the results of statistical calculations with results showing $t_{hitung} > [t]_{table}$, ie $17.7 > 2.06$ in 95% confidence level with 5% significant level and degrees of freedom 24. Thus, the method of contextual teaching and learning effective
