ABSTRACT

This study aims to improve student learning outcomes through visual learning media on the subtheme of human growth and development. Classroom action research was carried out in class III SDN Cilampeni 2 Katapang, Kabupaten Bandung. This research is motivated by the condition of students in class III SDN Cilampeni 2 Katapang, Kabupaten Bandung who are not active, and passive in responding to activities in learning because students are not provided with student books and teachers often use lectures or conventional, and there is no inclusion of the use of instructional media in So the RPP has never been implemented. This study uses the Classroom Action Research (CAR) method using a cycle system consisting of planning, implementation, observation, and reflection. This research was conducted in 3 cycles. In each cycle the learning activities are carried out by including visual learning media into the lesson plans and implementing learning in the classroom. Evaluation techniques used in this study are test and non-test techniques. Test techniques to determine student learning outcomes, and non-test techniques to determine student learning activities in using visual learning media and know the cultivation of caring and polite attitude. The results showed that the use of visual learning media can improve student learning outcomes. This can be seen from the average value of the increase in student learning outcomes from cycle I to cycle III, ie in cycle I appears 33% learning outcomes with enough categories, second cycle 60% with good categories and cycle III 90% with very good categories. The conclusion obtained from this study is that the use of visual learning media is very supportive to the improvement of student learning outcomes in the Subtema Pertumbuhan dan Perkembangan Manusia in class III SDN Cilampeni 2 Katapang, Kabupaten Bandung. This, the use of visual learning media can be used as one of the learning media to be applied to Thematic learning.

Keywords: visual learning media, learning outcomes
