ABSTRACT

Research entitled "Analysis of the Effectiveness of Cooperative Learning in Class IV in Primary Schools." motivated by the lack of student learning outcomes because students lack an active role in the learning process, get bored quickly in learning and are less conducive to learning. This study aims to analyze cooperative learning in fourth grade students in primary schools. The research used is the Study of Literature Study or Literature Study taken from the collection of material in the form of print media, journals, books, online media and so on, by way of voting. Based on the analysis of the research data obtained, students can increase the activeness, effectiveness and learning outcomes of class IV student learning so that the cooperative learning method can be used as one of the learning methods applied by the teacher to learning activities in the classroom in order to increase student activity and learning outcomes.

Keywords: *Cooperative learning methods, learning effectiveness*
