ABSTRACT

This research aims to find out: (i) Know the great effectiveness of google classroom media use in economic subjects in SMAN 1 Dayeuhkolot. The research method used is a survey that uses a quantitative approach with a research sample of 100 students. Data collection techniques by means of documentation studies are to view the list of names of students sampled as well as questioners (questionnaires) and data processing techniques by means of validity tests, reliability tests, descriptive statistical tests, with the help of the IBM SPSS Statistics Version 25.0 for Windows program. The results showed: (i) students of Grade XI IPS at SMAN 1 Dayeuhkolot bandung district agreed with the statement submitted by the researchers on the effectiveness of learning with google classroom learning media which showed a score of 3,85 and a percentage of 76,8%, as well as a mean score of 61,84 stating that google classroom media is effectively used as a learning medium in economic lessons in SMAN 1 Dayeuhkolot. The authors advise the relevant parties: (i) students to be able to follow the changes in the learning system today so as not to be left behind in learning and to maximize technology to the maximum in order to get optimal results (ii) for teachers expected to be able to maximize all the skills of teachers in doing learning through online, so as to attract students to be asusiasm when learning online and get the desired results (iii) for schools expected to be able to improve the quality of learning systems in the network and maximize the utilization of technology (iv) for the next researcher who will conduct research on the same topic, it is expected to be more in search of sources of information, data and references more broadly and in depth, so that the results of the research obtained can be better.

Keywords : *Effectiveness of learning, google classroom, economic subjects.*
